July 17, 2008: Shooting distance chart

Bridger™ Model C.G. 85 Line Throwing Gun Distances Standard Projectile (BP01)		
	140 lb test Shot Line (600' or 780')	70 lb test Shot Line (950' or 1250')
Heavy Load Blank Cartridges (HL50 or HL20)	450' – 550'	600' – 750'
Medium Load Blank Cartridges (ML20)	400' – 450'	500' – 650'
Light Load Blank Cartridges (LL20)	375' – 425'	450' – 550'
<p>Important: The above distances are based on shooting a standard projectile (BP01) according to the instructions provided with your line throwing gun kit and supplies currently sold by Naval Company Inc. Shooting downhill or with a strong tailwind can significantly increase distance and shooting uphill will reduce distance. Considering variations such as wind, angle of shot, elevation of final destination, and so forth, the above chart should only be used as a general guide.</p>
