

**December 1, 2007: Pelican™ Cases introduced**

In addition to the standard CG85 kit in a red painted wood USCG approved box, customers now have the option of having a line gun kit in a custom foam-fitted Pelican™ case. These cases hold 2 additional lines, twice as much blank ammunition, a bore snake for fast field cleaning, more projectiles and/or a flashlight, utility knife, gloves, hearing protection, shooting glasses or other supplies that might be of value in your kit. Pelican™ cases are not yet USCG approved. When they are, we will be sure to post it here! If you want to be notified immediately upon the USCG approval, please send an email to [beth@navalcompany.com](mailto:beth@navalcompany.com) and make this request.
